

Thermostatic Mixing Modules

Solutions for radiant in-floor designs

- Radiant floor pump controls for 1-5 heating zones
 - Independent circulation pump and thermostatic control for each zone
 - Simplifies system design
-
- Factory engineered in an attractive white cabinet

Thermostatic Mixing Modules (TMM™) are a factory engineered solution to control multi-zone radiant in-floor heat. Pre-sized in a range of system capacities, TMMs provide independent control for up to five heating zones.

Each zone has its own circulation pump and independent thermostatic control.

Factory pre-engineering makes system design easy – simply choose the TMM model that is right for your application. Installation is easy as well. All supply and radiant loop connections are copper sweat and the system is totally compatible with all manufacturers' piping and manifold systems.

The unit is contained in an attractive white painted cabinet, to allow for installation in finished rooms. The compact design allows the TMM to be recess mounted between studs. The cabinet can also be mounted upside down for supplying radiant loops overhead. The door lifts out easily for access to the pump modules.

A range of models ensures a TMM system that is right for your application.

Thermostatic Mixing Modules

Pump modules for radiant floor heating systems

Description	For Boilers and Tank Type Water Heaters	For Direct Connection to Tankless Water Heaters
One zone Up to 40,000 Btu/hr.	TMM40-I	TMMD40-I
Two zones Up to 55,000 Btu/hr.	TMM40-II	TMMD40-II
Three zones Up to 57,000 Btu/hr.	TMM40-III	TMMD40-III
Four zones Up to 58,000 Btu/hr.	TMM40-IV	TMMD40-IV
Five zones Up to 58,000 Btu/hr.	TMM40-V	TMMD40-V
One zone Up to 70,000 Btu/hr.	TMM70-I	TMMD70-I
Two zones Up to 70,000 Btu/hr.	TMM70-II	TMMD70-II
Three zones Up to 70,000 Btu/hr.	TMM70-III	TMMD70-III

Each module includes:

- One pump per zone.
- One thermostatic mixing valve.
- Attractive white finished cabinet which can be recessed or surface mounted.
- Controls for connection to 24VAC thermostats (one per zone).
- Pump exerciser (specify when ordering).
- Electrical cord.
